1. place aquarium on **Strong, Stable Surface**

**Making Success Simple**

**Drip Loop**

Whenever you plug in any electrical appliance, it’s important to utilize a “drip loop”. This prevents water droplets from reaching the electrical outlet, which can cause a severe hazard.

To make a drip loop, follow the diagram to the right. Simply drop the power supply cord below the level of the outlet you’re plugging it into. This way, if any water should get on the cord, it will drip off before it reaches the electrical outlet.

See reverse for additional information.
2. add Gravel

- Carefully pour rinsed gravel into middle of aquarium
- Spread gravel evenly around aquarium bottom
- Gravel depth should measure 1” - 3” from the bottom

3. add Plants, Décor

- Place plants and décor items into aquarium in desired location
- Cover base of plants and bottom of décor items with gravel to hold securely in place

4. add Water

- Pour room-temperature water into aquarium over hand to avoid moving gravel, plants, and décor
- Fill aquarium with water to 1/2” from top of frame
- Add water conditioner

5. place Filter

- Assemble filter and insert filter cartridge according to included instructions
- Place filter in designated location on back for frame

See reverse for additional information.
6. add **Heater** (optional, not included)

- Read and follow instructions included with heater
- Place heater just to one side of filter, then suction to back of aquarium

7. add **LED Hood**

- Place light hood on aquarium making sure filter and heater cords flow through opening in hood for proper fit
- Plug in filter, light hood and heater using the “drip loop” method (see above)
- Use switch to turn on light

8. add **Fish**

- Turn off light, unplug and remove light hood
- Place fish, while in bag from store, into aquarium, and let sit for 20 minutes
- Open bag and add about 1/2 cup of aquarium water, wait five minutes and repeat
- Carefully allow fish to enter aquarium, replace light hood and plug in

---

**Simply Succeed**

Follow the Three Tips to Succeed along with the setup guide instructions, and you’ll spend more time enjoying a healthy aquarium and less time maintaining it.
