**Aquarium Setup Guide**

**NEO GLOW**

Includes 3 TIPS to Succeed

**1. place aquarium on Strong, Stable Surface**

**2. add Gravel**

Rinse gravel in colander

Make sure surface is level

- Place aquarium evenly on a level surface so that all sides of aquarium are supported.
- Surface should be able to easily support more than 100 lbs.

**3. Water Changes**

Only change 25% of the water once per month.

Never empty all the water at once.

**Success Tip 1**

**Lighting**

Only keep aquarium lights on for 8-10 hours during the day, then turn off at night.

**8-10 Hours of Light per day**

**Success Tip 2**

**Feeding**

Give your fish one small pinch of food 2-3 times per day.

**1 Pinch of Food 2-3 times per day**

**Success Tip 3**

**Water Changes**

Only change 25% of the water once per month.

Never empty all the water at once.

**IMPORTANT SAFETY INSTRUCTIONS**

**WARNING**

To guard against injury, basic safety precautions should be observed including the following:

1. READ AND FOLLOW ALL SAFETY INSTRUCTIONS.
2. DANGER - To avoid possible electric shock, special care should be taken since water is employed in the use of aquarium equipment. For each of the following situations, do not attempt to repair yourself; return the appliance to an authorized service facility for service or discard the appliance.
   - A. If the appliance falls into the water, DO NOT reach for it! First unplug it and then retrieve it. If electrical components of the appliance get wet, unplug the appliance immediately.
   - B. Carefully examine the appliance after installation. It should not be plugged in if there is water on parts not intended to be wet.
   - C. Do not operate any appliance if it has a damaged cord or plug, if it is malfunctioning or if it is dropped or damaged in any manner.
   - D. To avoid the possibility of the appliance plug getting wet, position aquarium stand and tank to one side of a wall mounted receptacle to prevent water from dripping onto the receptacle or plug. A "drip loop", shown in the figure below, should be arranged by the user for each cord connecting an aquarium appliance to the receptacle. The "drip loop" is the part of the cord below the level of the receptacle, or the connector if an extension cord is used, to prevent water traveling along the cord and coming in contact with the receptacle. If the plug or receptacle does get wet, DO NOT unplug the cord. Disconnect the fuse to the circuit breaker that supplies power to the appliance.
3. Close supervision is necessary when any appliance is used by or near children.
4. To avoid injury, do not contact moving parts or hot parts such as heaters, reflectors, lamp bulbs, and the like.
5. Always unplug the appliance from the outlet when not in use, before putting on or taking off parts, and before cleaning. Never yank the cord to pull plug from outlet. Grasp the plug and pull to disconnect.

**Making Success Simple**

**Drip Loop**

Whenever you plug in any electrical appliance, it’s important to utilize a “drip loop”. This prevents water droplets from reaching the electrical outlet, which can cause a severe hazard.

To make a drip loop, follow the diagram to the right. Simply drop the power supply cord below the level of the outlet you’re plugging it into. This way, if any water should get on the cord, it will drip off before it reaches the electrical outlet.

See reverse for additional information.
1. place aquarium on Strong, Stable Surface
2. add Gravel
   - Carefully pour rinsed gravel into middle of aquarium.
   - Spread gravel evenly around aquarium bottom.
   - Gravel depth should measure 1”- 3” from the bottom.
3. add Plants, Décor
   - Place plants and décor items into aquarium in desired location.
   - Cover base of plants and bottom of decor items with gravel to hold securely in place.
4. add Water
   - Pour room-temperature water into aquarium over hand to avoid moving gravel, plants and décor.
   - Fill aquarium with water to 1/2” from top of frame.
   - Add water conditioner.
5. place Filter
   - Assemble filter and insert filter cartridge according to included instructions.
   - Place filter in designated location on back of frame.

Add Water Conditioner as directed
Rinse filter cartridge before use
Rinse plants and décor items
Rinse gravel in colander

6. **add Heater (optional)**

- NeoGlow LED Aquarium Kit Size 10 includes a heater. Heaters for other kits must be purchased separately.
- Read and follow included heater instructions.
- Place heater just to one side of the filter and suction to the back of the aquarium.

7. **add LED Hood**

- Place light hood on aquarium, making sure filter and heater cords flow through opening in back of light hood to ensure proper fit.
- Plug in filter, light hood and heater using the “drip loop” method. (see above)

8. **add Fish**

- Turn off light, unplug and remove light hood.
- Place fish, while in bag from store, into aquarium. Let sit for 20 minutes.
- Open bag and add about 1/2 cup of aquarium water. Wait 5 minutes. Repeat once.
- Carefully allow fish to enter aquarium. Replace light hood and plug in.

**3 TIPS to Succeed**

Simply succeed!

Follow the Three Tips to Succeed along with the setup guide instructions, and you’ll spend more time enjoying a healthy aquarium and less time maintaining it.
