

# QuietFlow® LED PRO Aquarium Power Filters

**Get the signal.**

Filter maintenance just got easier. Each filter is now equipped with an LED cartridge change indicator that flashes when cartridges become clogged. As the water level rises within the filter, this triggers the LED to flash, signaling it's time to replace the cartridge. Also included is a replaceable specialty filter pad that adds a fifth stage of filtration to water before returning to the aquarium. **Maintenance made easy!**

LED Cartridge Change Indicator

Replaceable Specialty Filter Pad

# QuietFlow® Specialty Filter Pads

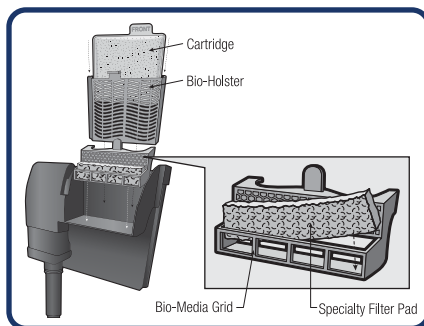

Enhance water filtration with Aqueon® QuietFlow® Specialty Filter Pads. Designed specifically for Aqueon® hang on back units, these pads provide an additional stage of mechanical filtration and can help address water quality issues.

There are three varieties to help address different water challenges:

**Ammonia Reducer:** Focuses on removing harmful or toxic ammonia from water.

**Carbon:** Removes pollutants that discolor water and causes odor.

**Phosphate Remover:** Reduces phosphate level contributes to algae growth and traps excess waste, food and other organic debris from water.

Replacement is quick and easy
