Perfect Your Pond Care Routine with Aqueon

2,500 GALLONS FOR 4 WEEKS

Maintain a crystal clear and healthy pond effortlessly with our dual-action solution. The **PURE** Pond Rescue Ball tackles sudden ammonia and nitrite spikes, restoring balance in ponds up to 2,500 gallons for 4 weeks. Meanwhile, the **PURE** Pond Sludge Remover Ball effectively breaks down sludge and organic waste, also treating 2,500 gallons for 4 weeks.

FEATURES

- Treats ponds up to 2,500 gallons for 4 weeks
- Controls ammonia and nitrite levels
- Reduces organic waste and prevents sludge buildup
- Less work for your filter means reduced maintenance time
- Promotes a healthy, oxygen-rich pond environment

See page 48 for details.

Bright Ideas for Smarter Aquariums

Create an enjoyable environment for you and your fish! This slim, low-profile light is fully customizable using the free Aqueon® BlueIQ™ App via Wi-Fi or Bluetooth. Control the white, blue, and color LEDs separately, with intensity adjustable in 1% increments.

FEATURES

- Optimal 24-hour default schedule with customizable options.
- Weather effects: cloud coverage and lightning for dynamic ambiance.
- Saltwater option available.
- Additional App Features
 - Monitor all aquariums and schedule maintenance.
 - Get feeding reminders, quick tips, and exclusive offers.

3 Simple Steps for a Water Change using SmartClean™ Technology

1

Remove filter cover.
Pull water discharge arm
straight up until water
flow shuts off. (Collection
containers not included.)

2

Swivel and extend nozzle
over water container. To
begin pumping water out
of the aquarium, push
water discharge arm down;
empty 25% of aquarium
water. Compatible with
flexible tubing.

3

Lift up water discharge
arm to shut off flow and
return to original starting
position to restart filter.
Refill aquarium with new
treated water.

It's a Filtration Revolution.

Choosing the Right Aquarium
 on Aqueon.com

Standard Aquariums

The standard aquarium is crafted with precision to guarantee its resilience for a wide range of uses. Larger aquariums are equipped with single-piece center-braced frames, effectively eliminating any bowing of the glass.

(See page 57 for sizing information and critical dimensions of all aquariums.)

Silicone Aquarium Sealant

100% silicone aquarium sealant is easy to apply to stop leaks. The high-strength silicone creates a permanent water-tight seal that will not crack or shrink. It's formulated to be non-toxic, making it perfect for use on all aquariums.

Item No.	Color / Size	Case Qty.	Retail Package Dimension (L" x W" x H")	UPC

Reef-Ready Aquariums

with Overflow Accessory Kits

The MegaFlow and Corner Overflow systems are engineered to allow maximum water flow to the main filter system while greatly reducing cascading water sound. The Aqueon® overflow system design includes multi-level water intakes, providing more effective circulation and filtration and eliminating dead water zones in your aquarium.

Features & Benefits

- The back wall MegaFlow design keeps unsightly plumbing hidden
- Sleek black silicone seals
- Securely bonded and sealed to the back
- Stack rock or decorations up against it
- MegaFlow single-molded overflow aquarium Overflow: 600 GPH each.
- **Overflow Accessory Kit included!**

Assembled in the U.S.A.

Overflow Accessory Kit

This simple-to-install kit contains bulkhead fittings, adjustable drain pipe, return pipe with dual flexible nozzle and straight barb fittings. Fits MegaFlow and Corner Overflow aquarium systems.

How it works:

1. Water flows in from the bottom, middle and top inlets and spills over inner wall of overflow into reservoir.
2. Unfiltered water passes through drain pipe and out of aquarium to main filter system.
3. Filtered water is pumped back into aquarium.

Item No.	Retail Package Dimension (L" x W" x H")	UPC
100129251	27.75 x 4.875 x 3.375	0 15905 29251 1

Overflow Accessory Kit Contents:

- Adjustable Drain Pipe • Dual Nozzle • Return Pipe • 3/4" Elbow • 1" Bulkhead • 3/4" Universal Bulkhead • Air Intake Elbow • 90° Elbow • Drain Pipe Base • Strainer • Universal Bulkhead Wrench

Rimless and Frameless Aquariums

Simplicity meets elegance! The minimalist design of a frameless aquarium helps accentuate the natural beauty of any flourishing aquatic ecosystem. Made with high quality glass construction, these tanks can be used for both freshwater or saltwater applications.

Edgelit Rimless Glass Aquariums

Create a stunning centerpiece for your home – inside and out! The minimalist design of a frameless and rimless aquarium gives a unique way to display your fish. Smooth, clear silicone and polished, beveled edges provide an elegant and modern design to keep the focus on your fish. Glass top is included and recommended to help prevent evaporation and keep fish from jumping out of aquarium. Edgelit Kits Size 3 and Size 6 include a remote to change the color of the LEDs.

Item No.	Aquarium Size	Case Qty.	Retail Package Dimension (Item Dimensions) (L" x W" x H")	UPC

Lighting not included.

Rimless Glass Aquariums

The rimless top in this sleek aquarium creates a clean aesthetic while the bottom frame provides support and stability. Each exposed glass edge is polished and beveled to create a finished look. Clear support brackets are included and should be placed on the side edges of the aquarium to support a glass top. Glass top can be purchased separately and is recommended to help prevent evaporation and keep fish from jumping out of aquarium.

Item No.	Aquarium Size	Case Qty.	Retail Package Dimension (Item Dimensions) (L" x W" x H")	UPC

Each aquarium is complete with a foam leveling mat which is **REQUIRED** for use under the aquarium to help protect both the aquarium and your aquarium stand.

Aquarium Starter Kits

Starter kits make it easy for customers to start out in the hobby or upgrade their current setup while providing retailers a great opportunity for add-on sales of gravel, decorations and fish. Aqueon® kits contain high-quality components that are designed for easy use and maximum performance.

Siamese Fighting Fish
(*Betta splendens*)

BettaBow 1 with Quick Clean Technology

Aqueon® BettaBow 1 with Quick Clean Technology make first time betta keeping easy. This kit is equipped with Quick Clean Technology, a uniquely designed side spout that helps empty the aquarium quickly with no mess making water changes easy to perform in only 1 minute. Also included are two collection cups, premeasured for a 20% water change, to make your aquarium maintenance even easier. Use one of the collection cups to collect the water from the drain spout and the other to add conditioned water to the aquarium, stirring up uneaten food and waste while purging dirty water from the aquarium. Aqueon® BettaBow 1 with Quick Clean Technology is easy for you and great for your fish!

Item No.	Aquarium Size	Case Qty.	Retail Package Dimension (Item Dimensions) (L" x W" x H")	UPC
100542857	1	4	8.5 x 6.25 x 9.25 (7.875 x 6 x 9)	0 15905 00190 8

Water Change Steps

- Remove hood and position first collection cup under side spout; activate spout.
- Use second collection cup to add conditioned water into aquarium; dirty water is forced out.
- Close spout.
- Continue to add clean conditioned water to fill line.

LED MiniBow™ and LED BettaBow Kits with SmartClean™ Technology

These Aqueon® kits with SmartClean™ Technology are great for first time and experienced fish keepers. The uniquely designed power filter with SmartClean™ Technology makes essential water changes quick, fast and easy to do in less than 2 minutes! With just a couple minutes each week, you can help maintain a cleaner and healthier aquatic environment for your fish. Simply rotate the filter arm, remove about 10-25% of the aquarium water and refill with treated tap water. *It's that simple!*

Water Change Steps

1 Remove hood; place collection container next to aquarium.
Collection containers not included.

2 Swivel and extend nozzle to begin pumping water out of the aquarium; empty 25% of aquarium water.

3 Retract nozzle, swivel and reposition over cartridge; add clean conditioned water to aquarium until full, then replace hood.

Lighting

Proper lighting is essential to the health and appearance of your aquarium. This is why Aqueon offers a wide variety of sizes and styles to fit your unique aquatic environment. A carefully designed range of replacement lamps provides additional options for general illumination, color enhancement and plant growth.

OptiBright® Smart LED Lights

Unlock a world of possibilities with the Aqueon® OptiBright® Smart LED Lights! Control your aquarium's ambiance seamlessly with the BlueIQ™ app, offering unparalleled controllability from anywhere. Dive into complete color customization, 24/7 scheduling convenience, and full spectrum lighting tailored to accommodate both freshwater and saltwater plants. Our commitment to optimal performance involves ongoing research and development, ensuring the accuracy of lux/PAR details. These Smart LED Lights redefine how you interact with your aquatic environment, revolutionizing the aquarium experience.

Features:

- Create customized lighting schedules including day/night cycles and sunset/sunrise
- 24-hour, 7-days a week scheduling available
- Choose from several preset lighting options for a quick start
- Adjust light intensity to your preference
- Add lightning storm or clouds to your environment
- Strip light on top for additional aquarium illumination
- Full spectrum lighting
- Optimal light for freshwater or saltwater fish and low-medium light level plants
- On/off switch for use without app and use with timer
- Adjustable mounting brackets to fit a variety of aquarium sizes

OptiBright®+ LED Lights

watch the video
 Aqueon.com

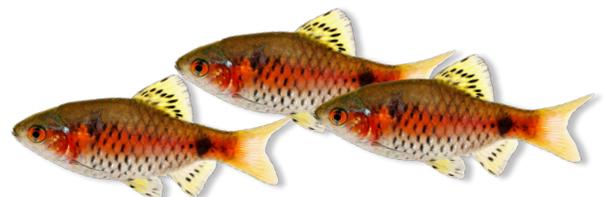

With the OptiBright®+ LED Light the possibilities are endless! The slim fixture includes bright white LEDs for general illumination, blue Moon Glows for nighttime viewing and RGB LEDs for enhanced colors. Each can be set to turn on/off individually using the 24-hour RF remote control and can also be dimmed in 10% increments, in manual mode.

- Automatic 30 minute sunrise/sunset modes replicate a natural cycle
- 3 scroll modes cycle through the RGB colors at different speeds
- Adjustable mounting legs for the perfect fit

OptiBright® LED Lights

watch the video
Aqueon.com

The slim, low-profile OptiBright® LED fixture features built-in LED lighting ideal for freshwater aquariums. Two individual touch controls provide the option to have the white/red LEDs on during the day and the blue moon glow LEDs at night. The fixture also includes adjustable legs that can be extended to accommodate multiple aquarium lengths.

Filtration

Effective filtration and consistent water flow play an essential part in the overall success of your aquatic environment. Aqueon® filtration makes it easy! There are a variety of options for any size aquarium, either fresh or saltwater. All Aqueon® filtration is simple to set up and maintain, incorporating both biological and mechanical filtration elements.

SmartClean™ Power Filters with EcoRenew™ Cartridges

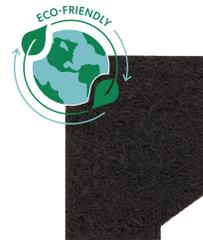

Enhance aquarium maintenance with the Aqueon® SmartClean™ Power Filter—an advanced system designed for optimal performance, simplicity, efficiency, and environmental responsibility. SmartClean™ Technology streamlines water changes in three easy steps, improving overall water quality effortlessly. Crafted from sustainable fibers infused with carbon, the Aqueon® EcoRenew™ Cartridge ensures efficient water cleaning and a commitment to responsible aquatic care. Aqueon’s planet-friendly cartridges effectively remove pollutants, organic debris, and odors from aquarium water. The Bio-Holster™ grid facilitates biological filtration with its innovative mess-free cartridge change design and NoDrip basin, ensuring a seamless and clean experience.

Betta Filters

Aqueon® Betta Filters are air operated filters that improve water quality by filtering water in small betta habitats, such as bowls and aquariums up to 3 gallons. The replaceable carbon and sponge cartridge keeps water cleaner and clearer. Each filter comes with a decoration (natural plant) to conceal the filter, along with accessories for operation (airline tubing, airline tubing suction cups, air adjustment valve and check valve).

An air pump is required for operation; sold separately.

QuietFlow® Specialty Filter Pads

Aqueon® Specialty Filter Pads are designed to address common water issues. The pads are pre-cut to fit in the Aqueon® QuietFlow® LED PRO Power Filter Bio-Media Grid. There are three varieties available:

Ammonia Reducing Helps to remove excess harmful or toxic ammonia

Carbon Removes pollutants and organic debris, improving water clarity and reducing odor

Phosphate Remover Helps to remove excess phosphate that contribute to algae growth while trapping excess waste, food and other organic debris

QuietFlow® Internal Power Filters

Aqueon® QuietFlow® Internal Power Filters are ideal for aquarium or terrarium use. They are fully submersible in a vertical or horizontal position and have direction control.

Item No.	Model	Suitable For Aquariums	Replacement Filter Cartridge	Case Qty.	Retail Package Dimension (Item Dimension) (L" x W" x H")	UPC
100537259	AT10	up to 10 Gallons	1 - Small	12	3.875 x 2.375 x 6.25 (3 x 1.375 x 5.75)	0 15905 00121 2

Replacement Filter Cartridges

For Aqueon® QuietFlow® Internal Power Filters. Each cartridge acts as a two-stage filter. The dense foam outer layer removes dirt and particulates while inside the activated carbon removes odor, organics and discoloration. The rigid frame ensures that water passes through the cartridge, and not around it, for optimal water filtration.

Item No.	Size / Pack Count	Case Qty.	Retail Package Dimension (L" x W" x H")	UPC
100106974	Small 2 Pack	72	3.375 x 1.5 x 5.75	0 15905 06974 8
100106975	Large 2 Pack	72	4.5 x 2 x 7.5	0 15905 06975 5

QuietFlow® Canister Filters

Aqueon® QuietFlow® Canister Filters offer multi-stage filtration, powerful flow rates and flexible setups for optimal performance. A unique feature is the Water Polishing Unit with carbon cartridge, which serves as the final stage of filtration. This unit makes ongoing maintenance easier; the cartridge can be replaced on a monthly basis rather than replacing the contents of the media baskets. Each unit includes biological, chemical and mechanical media, along with essential intake/output connections and hoses. The canister filters are designed for use with fresh and saltwater aquariums.

Item No.	Size	Suitable for Aquariums	Replacement Filter Cartridge	Case Qty.	Retail Package Dimension (Item Dimension) (L" x W" x H")	UPC
100107312	200	up to 55 Gallons	Large	2	9 x 10.875 x 22.25 (7.5 x 7.5 x 16.75)	0 15905 07312 7
100107313	300	55-100 Gallons	Large	2	9.5 x 13.75 x 22.875 (8.875 x 8.875 x 17)	0 15905 07313 4

Water Polishing Unit

Three Water Return Options

Water Polishing Unit acts as the final filtration step and quietly returns water by breaking the water surface and enhancing oxygenation

Water Director returns water in a directed flow, under the water's surface

Spray Bar extends the water return over the length of the tube, increasing circulation

Filter Media

For use with the Aqueon® QuietFlow® Canister Filters; appropriate for both freshwater and saltwater applications.

Foam Pads

Designed to fit Aqueon® QuietFlow® Canister Filters, these perform both mechanical and biological filtration. This pad promotes beneficial bacteria growth as well as traps small particles found in water. Contains 2 Foam Pads.

Aquarium Heaters

Whether providing warmth for a small desktop or large aquarium, Aqueon's assortment of heaters provide efficient warmth needed for aquatic environments. The assortment includes preset heaters, adjustable shatter-resistant quartz heaters and adjustable Pro Heaters. All heaters are fully submersible and can be mounted in either a horizontal or vertical position.

Choose the Right Heater!
See page 58 for a quick reference guide

Aquatic Flat Heaters

Aqueon® Aquatic Flat Heaters are designed for small desktops up to 10 gallons. They are completely submersible, easy to install and efficiently warm water.

Item No.	Watt	Aquarium Size	Case Qty.	Retail Package Dimension (Item Dimension) (L" x W" x H")	UPC
100533032	5 Watt	Up to 2 Gallons	48	3.75 x 1.75 x 7 (1.125 x .875 x 3.125)	0 15905 00069 7

Mini Heater

Aqueon® Mini Heater provides warmth to tropical fish. Designed with a shatterproof housing and thermal safety shut-off, this compact and completely submersible mini heater is perfect for desktop aquariums.

Item No.	Watt	Aquarium Size	Case Qty.	Retail Package Dimension (Item Dimension) (L" x W" x H")	UPC
100106193	10 Watt	Up to 5 Gallons	24	4.25 x 1.75 x 8.625 (1 x 1 x 3.375)	0 15905 06193 3

Preset Heaters

Aqueon® Preset Heaters require no adjusting! The preset temperature has been calibrated to 78°, appropriate for most tropical fish. The fully submersible heaters are constructed of shatter-resistant quartz glass and feature an automatic safety shut-off to avoid overheating. An LED indicator light displays red when actively heating.

Item No.	Watt	Aquarium Size	Case Qty.	Retail Package Dimension (L" x W" x H")	UPC
100106251	50 Watt	Up to 20 Gallons	24	3.5 x 1.5 x 6.5	0 15905 06251 0

Built-in on/off valve on gravel tube and sink attachment provide complete water flow control at your fingertips.

ProScraper 3.0® Replacement Blades, Pads and Twist & Click® Head

The Aqueon® ProScraper 3.0® Twist & Click® Stainless Steel and Plastic Blades are easily replaceable and a great option for when current blades become dull or worn down. For added versatility, the scraper blades can be quickly switched out with the Aqueon® Foam Cleaning Pad with Twist & Click® Head attachment. Both sides of the Aqueon® Foam Cleaning Pads can also be used for scrubbing without the scrapers. All accessories work with both sizes of the ProScraper 3.0® Aquarium Algae Scrapers.

Fish Food

Aqueon® fish foods were developed by aquatic hobbyists and fish nutritionists to provide essential nutrients for fish. All Aqueon® foods have been formulated using premium ingredients that fish are naturally attracted to. This assures a healthy diet bringing out the true color and energy of every fish.

Nutrinct®

100% Fish-Free Food

Most aquarium fish don't eat other fish, they eat algae, insects, and small crustaceans. Aqueon® Nutrinsect® food is a highly palatable, plant and insect-based, complete diet like the one your fish would naturally eat in the wild. This 100% fish-free formula does not contain fishmeal, whole fish, or fish oils, instead containing insect-based proteins, mealworms, daphnia, black soldier fly larvae, and bloodworms. By choosing a fish-free food, you are helping to protect and sustain Earth's oceans, while providing your fish with a diet that includes spirulina for color enhancement, along with added vitamins and minerals as part of their nutrition.

Pond Care

PURE Pond Rescue Bomb

Keep your pond water crystal clear and healthy with the Aqueon® **PURE** Pond Rescue Ball. Designed to tackle sudden issues like ammonia and nitrite spikes, this easy-to-use solution quickly restores balance to your pond. Each ball treats up to 2,500 gallons for 4 weeks, helping to reduce maintenance and keep your pond looking great, while also providing early detection of any issues in both freshwater and saltwater before your fish are adversely affected.

- Each ball treats up to 2,500 gallons for 4 weeks.
- Reduces organic waste and keeps the pond's natural balance.
- Helps control ammonia and nitrite levels.
- Less work for your filter and less pond maintenance for you!

Item No.	Pond Size	Case Qty.	Retail Package Dimension (L" x W" x H")	UPC
100550978	Up to 2500G	4	3.9 x 3.9 x 2.6	0 15905 00290 5

PURE Pond Sludge Bomb

The Aqueon® **PURE** Pond Sludge Remover Ball is an effective solution for breaking down sludge and organic waste in ponds. It's designed to tackle waste from dead plants, uneaten food, and other debris, helping to keep your pond clean with less effort. Simply drop it into your pond or filter, and it will work for up to 4 weeks, treating up to 2,500 gallons and reducing maintenance needs.

- Rapidly breaks down sludge and organic waste.
- Prevents sludge buildup, reducing maintenance time.
- Treats up to 2,500 gallons for 4 weeks.
- Promotes a healthy, oxygen-rich pond environment.

Water Care

Aqueon® water care products are designed to provide effective solutions to aquarium setup and use. Simple to understand and apply, these products help maintain the healthiest environment for your aquatic pets. Incorporate Aqueon® water care products during your initial aquarium setup, regular water changes, and when cleaning or replacing filter media to ensure the continued health and vitality of your fish.

Aquarium Test Strips

For both new and established aquariums, testing the water is crucial for the well-being of your fish. Similar to the importance of clean and healthy air for humans, fish require their water to be in optimal condition. Imbalances in water bacteria or elevated levels of substances like ammonia can lead to various issues, potentially resulting in fatal illnesses for your fish. Aqueon has two testing products to enhance water quality monitoring, allowing early detection of any issues in both freshwater and saltwater before your fish are adversely affected.

7-in-1 Aquarium Test Strips:

- All-in-one testing to check pH, total alkalinity, hardness, nitrate, nitrite, free chlorine, and iron levels to protect fish
- Fast and easy with results in 30 seconds

Ammonia Aquarium Test Strips:

- All-in-one testing to check ammonia levels to keep fish safe
- Fast and easy with results in 2 minutes

PURE

Live Beneficial Bacteria and Enzymes

Beneficial bacteria are needed to maintain a well-balanced aquarium. These bacteria live on the surfaces of the aquarium such as rocks, plants, décor and filter media. Unlike other liquid bacteria supplements, Aqueon® PURE comes in an easy to use ball providing a surface for nitrifying bacteria to live before being added to the aquarium.

PURE Betta Beads™

Aqueon® **PURE** Betta Beads™ products contain beneficial bacteria that help maintain a healthy environment in unfiltered aquariums. The beneficial bacteria aids in maintaining a balanced environment while the enzymes help breakdown organic sludge for better water clarity. These soft balls create a fun enrichment activity for bettas while also encouraging their natural foraging behavior. Watch your betta play in the beads like a fun ball pit as they dive in and out. Replace the beads monthly and remove uneaten food for optimal results.

Item No.	Color	Case Qty.	Retail Package Dimension (L" x W" x H")	UPC

*Made in the UK

Betta Beads™ products should last approximately 30 days before needing to be replaced. However, if you notice the beads have reduced significantly in size or your fish is able to ingest them – this is an indication that the water quality may not be optimal for your betta. Hard water is the main cause for **Betta Beads™** products shrinking prematurely; we recommend replacing the **Betta Beads™** immediately and using a softer water source (such as betta water).

Ammonia Neutralizer

Ammonia levels will rise naturally due to the accumulation of fish waste and the breakdown of any uneaten food in water. Harmful ammonia is neutralized and tap water is conditioned for fish after a single dose of Aqueon® Ammonia Neutralizer.

Item No.	Size	Case Qty.	Retail Package Dimension (L" x W" x H")	UPC
100106008	4.0 fl oz (118 ml)	36	1.625 x 1.625 x 5.375	0 15905 06008 0

Information

Sizing information

Use this information to plan what size aquarium fits your needs and space. For safety reasons, and to fulfill warranty requirements, it is essential to place your aquarium on an appropriately sized, suitably designed aquarium stand, which will meet all weight and safety specifications. Also, please note that tempered-bottom aquariums are exceptionally strong but cannot be drilled. (See page 7 for pre-drilled aquariums.)

(*Carrasius auratus*)

Aqueon® Glass Aquariums and Zilla® Reptile Enclosures

Tempered vs. Non-Tempered

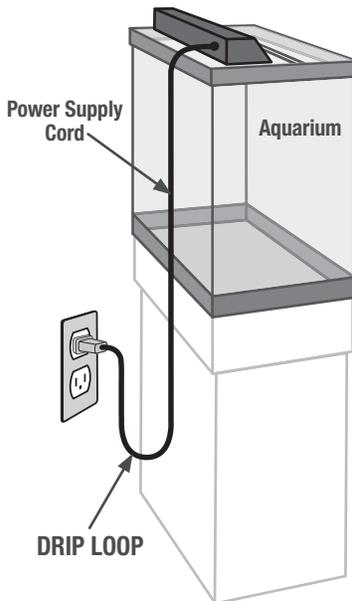

Due to glass availability, Central Aquatics may temporarily substitute regular or non-tempered glass panels with tempered glass panels. Any time a glass substitution is made, a sticker will be adhered to the aquarium/reptile enclosure bottom as a precaution to the end user.

Please note: Any aquarium/reptile enclosure that is altered in any way (i.e., drilled, attempted to be drilled, the center brace removed) by an individual outside of Central Aquatics, will deem the warranty null and void.

Power Cord Drip Loop

Since some of your aquarium equipment requires electricity to operate, your aquarium should be placed within close proximity to an electrical outlet.

One of the best and simplest tools that will enforce the separation of water and electricity is the “drip loop.” The drip loop is formed by ensuring that the power cords leading into the outlet approach the outlet from underneath the plug socket. If water drips down a power cord, it will fall off at the upward bend in the cord, never making it to the electrical outlet.

Aqueon® Heater Recommendations

Based on standard room temperature of 68°-72°.

AQUARIUM SIZE	TO INCREASE ABOVE ROOM TEMPERATURE:		
	5°F	10°F	15°F
5 Gallon	50 watt	50 watt	50 watt
10 Gallon	50 watt	50 watt	100 watt
20 Gallon	50 watt	100 watt	100 watt
30 Gallon	100 watt	100 watt	150 watt
55 Gallon	150 watt	150 watt	200 watt
75 Gallon	200 watt	200 watt	300 watt
90 Gallon	300 watt	300 watt	300 watt

Aqueon Warranty Information

Product Category	Warranty Length
Aquariums & Kits*	
Glass Aquariums & Kits* (75 gallon and Smaller)	5 Years
Glass Aquariums & Kits* (76 gallon and Larger)	Limited Lifetime
Frameless Glass Aquariums (14 gallon and Smaller)	90 Days
Frameless Glass Aquariums (15 - 55 gallon)	5 Years
Frameless Glass Aquariums (56 gallon and Larger)	Limited Lifetime
Edgelit Cube Aquarium	90 Days
Acrylic Aquarium Kits*	90 Days
Aquarium Furniture and Canopies	1 Year
Filtration	
SmartClean® Power Filter	Limited Lifetime
Quietflow® Power Filters	Limited Lifetime
Quietflow® Internal Power Filters	Limited Lifetime
ProFlex Sumps	Limited Lifetime
Quietflow® LED Power Filters	1 Year
QuietFlow® Internal Power Filters with SmartClean®	1 Year
Quietflow® E Internal Filters	1 Year
Quietflow® Canister Filters	1 Year
Betta Filter	90 Days
Heating	
Pro Heaters	Limited Lifetime
Submersible Glass Heaters	Limited Lifetime
Preset Heaters	1 Year
Mini Heaters	90 Days
Flat Heaters	90 Days
Lighting	
LED, Fluorescent, Incandescent Lighting	1 Year
Betta LED Light	90 Days
Replacement Bulbs (LED, T5, T8, Mini Compact)	90 Days
Pumps	
Circulation Pumps	Limited Lifetime
Quietflow® Utility Pumps	1 Year
Quietflow® Air Pumps	90 Days
Specialty Equipment	
Algae Cleaning Magnets	90 Days
Siphon Vacuum Gravel Cleaners	90 Days
Water Changers	Limited Lifetime
Fish Food	Satisfaction Guarantee
Water Care	Satisfaction Guarantee

*Please note: Each component within a kit falls under its respective product category warranty.

All Aqueon® product warranties are subject to limitations and exclusions. Please see product packaging or included instructions for details. For further questions or details, download product warranty information at aqueon.com or call an Aqueon customer service representative at 888-255-4527.

Online Replacement Parts

For commonly requested Aqueon® replacement parts, go to aqueonparts.com.

Aquarium Setup Guide

1. Find level location

- Aquarium should be placed and filled on a level, suitably-designed and appropriately-sized aquarium stand.

2. Add gravel, plants, décor

Rinse gravel in colander

Rinse plants and décor items

- Gravel depth should measure 1" - 3" from the bottom.
- Cover base of plants and bottom of décor items with gravel to hold securely in place.

3. Add room-temperature water

Add Water Conditioner as directed

- Fill aquarium with water to 1/2" from top of frame.

4. Add filter, thermometer, heater, light hood

Rinse filter cartridge before use

Add thermometer, heater to aquarium

Remove insert from back of light hood

- Allow aquarium temperature to stabilize; wait at least 24 hours before adding fish.

- Plug in filter, light hood and heater using the "drip loop" method (see page 69).

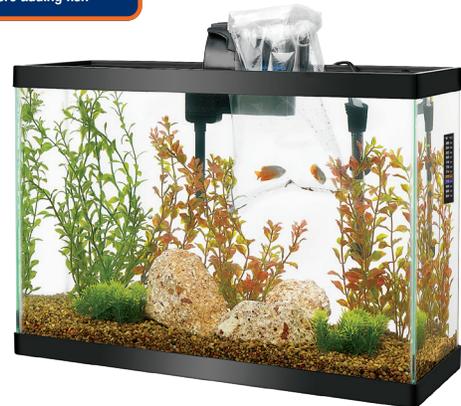

5. Add fish

Wait 24 hours before adding fish

- Turn off light, unplug and remove light hood.
- Place fish, while in bag from store, into aquarium. Let sit for 20 minutes.
- Open bag and add about 1/2 cup of aquarium water. Wait 5 minutes. Repeat once. Carefully allow fish to enter aquarium. Replace light hood and plug in.

Three Simple Tips for Aquarium Success

Success Tip 1

Lighting

Only keep aquarium lights on for 6-8 hours during the day, then turn off at night.

6-8

Hours of Light
per day

Success Tip 2

Feeding

Give your fish one small pinch of food 1 or 2 times per day.

1 Pinch

of Food
1 to 2 times per day

Success Tip 3

Water Changes

Change 10% of the water once per week.

Never empty all the water at once.

10%

Water Change
weekly

Practical Tips for a Healthy Aquarium

Aquarium keeping is a fun and rewarding activity that can provide years of enjoyment, education and even stress relief. When you're new at it, however, it's easy to do things that might not be good for your fish or your stress level.

Like all pets, aquarium fish rely on us for their essential needs in life, from a comfortable place to live to good food, clean water and peaceful neighbors. Fish that are well cared for live long happy lives, put on their best colors, are resistant to sickness and may even breed! Here are some important tips to help you give your fish the best possible living conditions.

Aquarium Decorations that Make the Perfect Habitat

Simply put, most aquarium fish need structure in their environment to feel safe, establish territory or seek refuge. In a well-decorated aquarium, fish tend to be less shy and live more comfortably. Territorial and semi-aggressive fish tend to quarrel less when there is ample cover. Decorating is also one of the most rewarding aspects of owning an aquarium. It allows you to personalize your aquarium, exercise your creative skills and turn that glass box into living art!

When choosing decorations for your aquarium, always take into consideration the needs of your fish. For example, schooling fish such as tetras, barbs, danios and rasboras enjoy swimming among plants (live or artificial), and choosing darker shades helps accent their bright colors. Place taller plants towards the back of the aquarium to create a backdrop and hide heaters, cords and filter tubes, with progressively shorter plants towards the front. For surface-oriented fish like gouramis, hatchetfish and livebearers, use plants that are taller than the aquarium to create overhangs. Floating plants such as duckweed, hornwort and *Salvinia* create the same effect and are easy to grow.

Fish that like to "den", such as redtails, rainbow sharks, certain types of cichlids, loaches, catfish, and certain types of plecostomus find refuge in hollow logs, caves, castles and sunken ships. They will often patrol the entrances to their lairs and ward off any fish that come too close. In aquariums with discus

or angelfish, decorate with pieces of driftwood angled from the surface down to the bottom to simulate the fallen trees and branches in their natural environment. For Rift Lake cichlids, use plenty of rockwork to simulate the boulder fields found in their natural habitat.

When introducing new additions to an aquarium with territorial fish such as cichlids, it's a good idea to rearrange existing décor to eliminate old territorial boundaries and add new decorations to create additional habitat for the newcomers.

Artificial and Natural Aquarium Décor

Natural décor items include rocks, driftwood, and live aquatic plants. Natural decorations can be used to influence water chemistry to suit the fish in your aquarium.

For instance, driftwood can be used to lower pH and alkalinity for Amazonian and Southeast Asian fish. Limestone and other calcium carbonate-based rocks have the opposite effect, raising pH and alkalinity for African Rift Lake and Central American cichlids, as well as livebearers and brackish water fish.

Artificial decorations such as castles, sunken ships, figurines, silk or plastic plants, simulated logs and rocks allow aquarium owners to create themed displays or match surrounding room décor. Do not use metal or any material that might dissolve or release toxins into the water.

Feeding Your Fish

Fish in nature spend much of their day either eating or trying to avoid being eaten. Some fish are omnivorous, meaning they eat different types of food. Others are herbivorous, feeding mostly on plant matter. Which leaves the carnivores, who feed on meaty foods such as insects, worms, crustaceans, amphibians, other fish and even small birds and mammals! Large predatory fish eat less frequently, while herbivores and omnivores graze throughout the day.

What Should You Feed Your Fish and How Often

Knowing what fish eat in nature helps the aquarist choose the proper food and gives some indication of how often they need to be fed. Most fish do best when fed once or twice daily. All food should be consumed in 2 minutes or less. Large predators do not catch food every day in nature,

and do not need to be fed every day in the aquarium.

Water quality will be better and filter maintenance will be required less often if these fish are fed less frequently.

Herbivores and fish that forage should be fed small quantities of food two to three times daily. Aqueon offers a complete line of flake, pellet, tablet and dried whole foods

to accommodate the nutritional needs of most ornamental fish.

Fish will normally find food whether it's at the surface, in mid-water or on the bottom. However, presenting it in the way they normally feed is helpful, especially for new arrivals or finicky eaters. For example, feed bottom feeders sinking foods, and flake or floating pellets to surface and mid-water feeders. Sometimes more aggressive feeders may intimidate shy fish, preventing them from getting enough to eat. A solution to this problem is to feed aggressive feeders first and once they are distracted, direct some additional food to sheltered areas where shy fish can eat in peace. Finally, many plecostomus, catfish and knifefish are nocturnal and stay hidden until the lights go out. While some fish may learn to eat during daylight hours, many will stay hidden and may not get enough to eat. Feed these fish after the aquarium light is turned off at night.

Always research the nutritional needs and feeding habits of your fish and provide for them accordingly.

Aquarium Water Changes

Regular partial water changes remove pollutants and growth inhibitors that accumulate over time and help stabilize pH and buffering capacity in your aquarium. They replenish trace elements and important minerals that are used by fish, invertebrates and plants, as well as the biological processes that maintain balance in your aquarium.

There are different philosophies regarding water changes in an aquarium, but the best practice is to do small partial water changes on a regular basis. Most hobbyists change 25% of the water in their aquarium every 2 to 4 weeks, but heavily stocked aquariums, those that house large messy fish or extremely sensitive fish, or aquariums that are fed generously will benefit from more frequent changes. Many "old school" aquarists perform a 10% to 25% water change on their aquariums every week. Changing more than 50% of the water is not recommended.

If your tap water has unusually high pH or alkalinity or is unsuitable for aquarium use due to high nitrates, phosphates or other problems, consider using a Reverse Osmosis Water Purification System. Reverse

osmosis (RO) or deionized (DI) water can also be purchased from many local fish stores. When using RO/DI water in freshwater aquariums, always add a trace element supplement to replace essential minerals and buffers that restore water to its natural state and promote optimum health, color and vigor in your fish and live plants. Bottled water can also be used provided it has acceptable chemistry.

Fish Transportation and Acclimation

[Click here for step by step instructions to acclimate new fish.](#)

Properly acclimating new fish purchases into your aquarium has a significant impact on their long-term health and well-being. Netting, bagging and transporting fish is highly stressful and water quality and chemistry can vary between your local fish store and your aquarium, precautions should be taken to ensure the transition is as stress free as possible. The greater the difference between the store water and your aquarium, and the longer your fish are in transit, the more time and care you should exercise when acclimating them. In addition, some fish are more sensitive to changes and require more gradual acclimation.

Be aware of any significant differences in pH, alkalinity, general hardness and nitrates between your aquarium water and the store where you are purchasing your fish. Go straight home after your fish or marine livestock purchase. In extremely cold or hot weather, transport fish in an insulated cooler or Styrofoam shipping container to avoid excessive temperature fluctuations. Do not place fish in the trunk of your car. Finally, be sure to research the fish you are buying in advance to ensure conditions in your aquarium are appropriate for them.
