3 TIPS to Succeed

Success Tip 1

Lighting

Only keep aquarium lights on for 8-10 hours during the day, then turn off at night.

8-10
Hours of Light
per day

Success Tip 2

Feeding

Give your fish one small pinch of food 2 or 3 times per day.

1 Pinch
of Food
2-3 times per day

Success Tip 3

Water Changes

Only change 25% of the water once per month. Never empty all the water at once.

Water Change
monthly

Making Success Simple

Drip Loop

Whenever you plug in any electrical appliance, it's important to utilize a "drip loop". This prevents water droplets from reaching the electrical outlet, which can cause a severe hazard.

To make a drip loop, follow the diagram to the right. Simply drop the power supply cord below the level of the outlet you're plugging it into. This way, if any water should get on the cord, it will drip off before it reaches the electrical outlet.

See reverse for additional information.

1. place aquarium on **Aquarium Stand**

- Place aquarium on stand evenly so that all sides of the aquarium bottom are supported
- Aquarium should be placed and filled on a sturdy, level surface away from direct sunlight, drafts and high activity areas

2. add Gravel

Rinse gravel in colander

- Carefully pour rinsed gravel into middle of aquarium
- Spread gravel evenly around aquarium bottom
- Gravel depth should measure 1" - 3" from the bottom

3. add Plants, Décor

Rinse plants and décor items

- Place plants and décor items into aquarium in desired location
- Cover base of plants and bottom of décor items with gravel to hold securely in place

4. add Water

Add Water Conditioner as directed

- Pour room-temperature water into aquarium over hand to avoid moving gravel, plants and décor
- Fill aquarium with water to bottom edge of top frame
- Add water conditioner

5. place Filter

Rinse filter cartridge before use

- Assemble filter and insert filter cartridge according to included instructions
- Place filter in center of back of frame

6. add Heater

- Read and follow instructions included with heater
- Place heater just to one side of the filter and suction to the back of the aquarium

7. add LED Light Hood

- Place light hood on aquarium making sure filter and heater cords flow through opening in back of light hood to ensure tight proper fit
- Plug in filter, light hood and heater using the "drip loop" method. (see above)

8. add Fish

- Turn off light, unplug and remove LED light hood
- Place fish, while in bag from store, into aquarium, and let sit for 20 minutes
- Open bag and add about 1/2 cup of aquarium water, wait five minutes and repeat once
- Carefully allow fish to enter aquarium, replace light hood and plug in

Simply Succeed

Follow the Three Tips to Succeed along with the setup guide instructions, and you'll spend more time enjoying a healthy aquarium and less time maintaining it.
